

# ATR TRUCK & LARGE EQUIPMENT BOOTHS

## STRENGTHENING BOOTH INTEGRITY.

Col-Met Spray Booths provides you with a superior overall design and high-integrity structure in our complete line of ATR spray booths for automotive, truck, large equipment and other high-capacity finishing applications. Col-Met ATR Truck and Large Equipment Booths can be designed and configured to fit your specific application needs. We have the capability to build custom systems for finishing trucks, construction equipment, recreational vehicles, and other larger equipment efficiently and economically.

- **Industry-leading, W6x9 and 10Ga steel vertical members placed every 10' of length** allow the booth to accept standard manlifts without upgrades or upcharges.
- **Bright, full-booth illumination is provided** by standard UL or ETL Listed, four-tube, 32-watt, fluorescent light fixtures.
- **No more "oil canning" effect** with our use of more structurally sound steel. Improper handling, installation, or attachment to misaligned steel supports can cause "oil canning."
- **"Anywhere placement" of personnel doors and light fixtures.** Our 14Ga horizontal stiffeners running the entire length of our booth allow for specific placements of doors and lights to fit your particular application.
- **5/16" bolts versus industry-standard 1/4" bolts** for tighter, more secure bolting. Our nut and bolt construction provides consistent structural stability and makes for simpler installation and reinstallation, if necessary.
- **Standard doors have adjustable slotted-hole hinges, not weld-on ones,** making it much easier to position and install the booth doors.
- **Booth design offers a substantial savings during installation**—taking up to 25% less time to complete the job.

# COL-MET ATR TRUCK & LARGE EQUIPMENT BOOTHS

## UPGRADE LIGHTS (OPTIONAL)

Col-Met exclusive high-efficiency light fixtures provide full-booth illumination with ETL Listed, four-tube, 48" long, 32-watt fluorescent lights. Inside or outside access light fixtures available.

## THE FIT AND FINISH

Entire structure can be finished with our **(optional)** TGIC polyester white for a professional and impressive look. Fit for function—the perfect booth for you.

## IT'S MORE THAN JUST TRUCKS.

ATR Commercial Grade booths are available for automotive, truck, construction equipment, recreational vehicles and other large equipment applications. Together with a combination of our air makeup units, mixing room and prep stations, Col-Met creates the most ideal system package for your operations.

Col-Met Spray Booths comply with all applicable OSHA and NFPA regulations.
